Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

2. Citations and Explanations (Rule 70.7)

Claims 1-8 meet the criteria set out in PCT Article 33(2)-(3), because the prior art does not teach or fairly suggest a method for simultaneously measuring ciliary beat frequency and metachronal wave frequency simultaneously in a sample of native epithelia or cell cultures including: detecting light backscattered from the sample surface with a microscope system and analyzing the backscattered light with a real-time analysis.

Claims 1-8 meet the criteria set out in PCT Article 33(4), and thus have industrial applicability because the subject matter claimed can be made or used in industry.
